I am an Informatics Engineering student at Dian Nuswantoro University, class of 2022. I have a keen interest in technology, especially in web-based and multiplatform software development. I am a person who enjoys learning new things, particularly about technology. I am a hardworking individual who loves to build relationships with new people and is always eager to learn.

EDUCATION

Loyola College High School

2019 - 2022

Bachelor's Degree in Informatics Engineering Dian Nuswantoro University

2022 - Now

Current GPA: 3.92/4.00

SKILL

Fullstack Developer

Fullstack Development: Proficient in web application development from start to finish, combining frontend and backend skills.

Programming Languages:

- HTML, CSS, and JavaScript: Experienced in building responsive and engaging user interfaces.
- PHP (Laravel, CodeIgniter): Skilled in creating and managing complex web application backends.

Frontend Framework:

- Vue.js: Expertise in using Vue.js to develop dynamic web applications with responsive and interactive user interfaces.

Backend Frameworks:

- Laravel: Proficient in developing PHP-based web applications using the Laravel framework, including database management, user authentication, and API integration.
- CodeIgniter: Familiar with developing web applications using the CodeIgniter framework for rapid creation and scalability.

Project Experience:

- Learning Platform Development: Participated in developing a web platform accessible at learn.dnccudinus.org, focusing on backend logic development using the Laravel tech stack.
- DINACOM DNCC 2024 Registration Web Development: Contributed to the development of the admin section of the competition registration web platform, accessible at dinacom.dnccudinus.org.
- UIN Walisongo Programming Competition Web Development: Created an accounting journal website using the Laravue Inertia JS tech stack, accessible at jurnal.in.dnccudinus.org with the demo account demo@jurnal.in and password 12345678.
- ITC 2024 Learning Platform Development: Developed a learning space for students facing academic challenges, using Laravel, Tailwind, and Alpine JS, along with Google OAuth for Gmail login. The platform is accessible at studynest.dnccudinus.org.

Mobile Developer (Flutter)

- Proficient in mobile application development using the Flutter framework and the Dart programming language.
- Project: Getasan Apps I developed an application used for receiving reports from residents in the Getasan district of Semarang regency. This application was developed using Flutter, with its API built using Golang. I utilized the Bloc state management pattern in its development.

Git and Github:

- Version Control: Proficient in using Git for source code version control, including branch creation, merging, and conflict resolution.
 - Continuous Integration: Familiar with integrating GitHub with CI/CD (Continuous Integration/Continuous Deployment) services for automating testing and application deployment.
-

ORGANIZATIONAL EXPERIENCE

Google Developer Student Club (GDSC) Dian Nuswantoro University

2022 - Now

Core Team Divisi Academy Flutter

As a Core Team member of GDSC within Universitas Dian Nuswantoro, I am responsible for overseeing several events related to academics, particularly focusing on Flutter, such as online sharing sessions and online workshops. My role involves:

- Event Planning: Organizing and planning events related to Flutter, including online sharing sessions and workshops, ensuring they align with the goals and objectives of GDSC and cater to the needs of the target audience.
- Promotion and Outreach: Promoting the events through various channels to maximize participation and engagement, reaching out to the university community and beyond to create awareness and generate interest in the events.
- Logistics and Technical Support: Handling logistical arrangements for the events, such as venue booking or online platform setup, and providing technical support to ensure smooth execution during the sessions and workshops.

Dian Nuswantoro Computer Club (DNCC)

2022 - Sekarang

Mobile Flutter Division Coordinator

During my tenure as a member of the Mobile Division within DNCC in 2022, I actively participated in various programs and initiatives. Here are some of the key activities I was involved in during the 2022-2023 term:

1. Dinus Application Competition (DINACOM) 2023:

- Served as a committee member responsible for organizing the DINACOM competition, a national-level programming competition for vocational high schools. This role involved coordinating various aspects of the event to ensure its successful execution.

2. DNCC Goes To School (GTS) at SMK 8 Semarang:

- Participated in the DNCC Go To School initiative, where DNCC members conducted sessions at SMK 8 Semarang to teach mobile programming using the Flutter framework. This involved preparing and delivering engaging and informative sessions to introduce students to mobile development concepts and tools.

During my tenure as the Coordinator of the DNCC Mobile Division for the 2023-2024 term, I spearheaded several impactful initiatives and programs:

• Coordination of DNCC Mobile Division:

- Led the Mobile Division within DNCC, overseeing its activities and ensuring effective collaboration among team members to achieve divisional goals.

• Development of Devlearn Website:

- Conceptualized and developed Devlearn, an educational website accessible at learn.dnccudinus.org. This platform aimed to provide learning resources and tutorials for various technology topics to DNCC members and the wider community.

• Basic Training Next Generation (BTNG) 2023:

- Served as a Flutter mentor in the Basic Training Next Generation bootcamp organized by DNCC. This involved providing guidance and support to participants as they learned Flutter development skills.

• DNCC Goes To School (GTS) 2024:

- Took on the role of Executive Chairman for DNCC GTS 2024, leading the planning and execution of the program. DNCC GTS involved conducting technology workshops and sessions at schools to introduce students to programming and technology concepts.

AWARD

3rd Place - Programming Competition

UIN Walisongo Informatic Engineering

- Third Place Winner, Programming Competition organized by HMJTI - Walisongo State Islamic University Semarang, October 2023.
 - Developed cutting-edge Accounting Journal application using Laravel, Vue, and Tailwind CSS.
 - Website: jurnal.in.dnccudinus.org

2nd Place - Information Technology Competition (ITC) 2024

HMTI Dian Nuswantoro University

Second Place Winner, ITC competition organized by HMTI - Dian Nuswantoro University, January 2024.

- Developed a learning space platform application using Laravel, Tailwind, and Alpine JS.
- Website: studynest.dnccudinus.org

2nd Place - Hi-Technology 2024

HMTI Dian Nuswantoro University

Second Place Winner, Hi-Technology competition organized by HMTI - Dian Nuswantoro University, January 2024.

- Developed a learning space platform application using Laravel, Tailwind, and Alpine JS.
- Website: studynest.dnccudinus.org

CERTIFICATION

Certificate in Learning Javascript Programming

April 2023

DICODING

I have completed a course from the Dicoding Scholarship entitled Learning Javascript Programming which explores the basics of Javascript programming. Credential ID: 81P2312JQXOY

Certificate Laravel

Juni 2023

Coding Studio

This course contains Laravel 9 programming material from basic to advanced. Credential ID: 19731 codingstudio.id

Learn PHP

April 2023

Sololearn

This course contains basic to intermediate PHP programming material. Credential Id: CT-SVBPYZAZ sololearn.com

Dart Language Programming

September 2023

Dicoding Indonesia

This course contains basic to intermediate Darts programming material. Credential ID: L4PQ83787Z01

Learn to Make Flutter Apps for Beginners

November 2023

Dicoding Indonesia

This course contains basic to intermediate PHP programming material. Credential ID: JMVZ1YD5QXN9

Flutter and Dart Programming

September 2023

Udemy

This course contains Flutter and Dart material. Credential Id: UC-7c42a12b-9970-4668-b4d0-7392e20e9c95
